About Wallbridge Mining

Wallbridge is currently advancing the exploration and development of its 100%–owned Fenelon Gold property located along the Detour–Fenelon Gold Trend, an emerging gold belt in northwestern Québec. Within three years of the discovery of the Area 51 and Tabasco/Cayenne Zones, through drill programs totaling over 300,000 metres, Wallbridge reached an important milestone by announcing a maiden Mineral Resource Estimate (MRE) for Fenelon and an updated MRE for the Martiniere Gold Property totalling 2.67 Moz Au in the indicated category and 1.72 Moz Au in the inferred category (for details of the MREs see Wallbridge's press release dated November 9, 2021 and Technical Report filed December 23, 2021 on [SEDAR](#)).

Both properties are located on the Company's 910 km² land package along the Detour-Fenelon Gold Trend in Northern Abitibi, Québec, with significant potential for further discoveries over a 97–kilometre strike length of this underexplored belt.

Wallbridge is also the operator of, and a 17.8% shareholder in, Lonmin Canada Inc., a privately–held company with a portfolio of nickel, copper, and platinum–group metals (PGM) projects in Ontario's Sudbury Basin.
