

Wallbridge Mining Company Limited is a Canadian Junior Explorer-Developer currently conducting advanced exploration at the Fenelon Gold project located in Northern Abitibi, Quebec, Canada. Wallbridge also controls a large prospective land package along the Sunday Lake Deformation Zone, otherwise known as, the Detour – Fenelon Gold Trend which stretches from Kirkland Lake Gold’s Detour Lake Mine in Ontario to Wallbridge’s Fenelon Gold property. Wallbridge is currently advancing the Fenelon Gold project towards a maiden resource and economic studies and continues to grow its team. If you are eager to join this energetic and motivated team with opportunities for personal growth, our organization presents competitive opportunities for you.

The HSE Manager has overall accountability for the definition, implementation, and rollout of the HSE Strategy including associated training at all levels of the organization while working closely with Human Resources where needed. The HSE Manager also leads the building of cooperative partnerships with our First Nation partners and Indigenous Affairs, participating, and leading consultations and engaging in cultural awareness activities.
